RE: “ On-Line Anytime” Course Information

Dear Colleague,

Thank you for your interest in our “On-line Anytime” seminar. If you are looking for a structures review course to fit your schedule, your location and a review at your pace, the PREPARE “On-Line Anytime” course is for you.

About the Course

The General Structures and Lateral Forces seminar is presented by [PREPARE, Inc. \(PREPARE\)](#) in conjunction with the [University of Illinois School of Architecture Building Research Council](#). The entire General Structures and Lateral Forces review Course is approximately 35 hours in length. The General Structures review is approximately 27 hours and the Lateral Forces review is 7+ hours in length. The course presented on-line is the same course that we present live and in-person when we travel from venue to venue around the country.

The course is presented through the virtual distance learning program [Elluminate](#).

Advantages of Taking this Course

- You would have access for 1 month to the recorded sessions. You can watch the recordings at your own pace, and they would be available to you anytime, 24 hours a day, 7 days a week.
- You will be able to see the questions that other students pose and our response.
- Rewind, re-watch and review sessions until you understand the concept.
- Print the annotated whiteboard presentation to supplement your notes.
- Marc Mitalski will be available to talk with you via phone, or e-mail, or in an Elluminate break-out room to answer specific questions that you have.

Cost and How to Register

The cost to view the recorded sessions of the entire GS and LF course is \$350.00. (If you need access to the GS course alone, the cost is only \$250.00 and the cost of the LF course as a stand alone is \$150.00)

If you need access to the sessions beyond one month, then it \$50.00 for each two-week period.

To register for the course contact my colleague Janice Shiffer, with the University Of Illinois School Of Architecture Building Research Council, at: **1-888-633-3603**. Upon your registration, we will send you your login and password to access the recordings, directions on how to get started with the recordings, a link from which you can download the course workbook, other supplemental material and sample problems.

PREPARE.

Testimonials

We have found the on-line course, both live and recorded to be as successful in preparing students for the ARE GS and LF sections. Below is a recent e-mail that we received from Leonard Camposano regarding his experience with the on-line course, how he used the recordings and his successful completion of the General Structures and Lateral Forces Sections.

Marc,

I passed both gs and lf!!!! I can not imagine, not taking your course and passing it!!!

I could not have done it without your help!!! Your patience and of course your knowledge and method of teaching was invaluable. I replayed all the sessions and reviewed all my notes from your class at least 2 times.

This was my first e-class and I am convinced this is a great way and a great tool, to teach your course. It really allowed me to rewind / review / replay as much as I needed, any part I was not comfortable with. I replayed your class the same way my son watches his cartoons... Over and over until I am singing the formulas in my head!!!

All architect registered and working on registration will greatly benefit from your knowledge and methods of teaching architecture structure!!! I certainly did!!! As much as helping me pass gs and lf, your course actually highlighted and clarified a lot of the structural questions I've had as architect.

Again, please give me a call if you are in the NYC area, perhaps we can go for dinner/drinks on me!!!

Thank you!!!

Sincerely,

leonard v. camposano
